

# Preventive care services

## Preventive care services

UMR is dedicated to helping people live healthier lives. We encourage you to obtain preventive care services and health screenings, as appropriate for your age, to help maintain or improve your health and achieve your health and wellness goals.

Regular preventive care visits and health screenings may help to identify potential health risks for early diagnosis and treatment.

Most health plans typically cover preventive services, as specified in the health care reform law<sup>1</sup>, at 100 percent without charging a co-payment, co-insurance or deductible, as long as they are received in your health plan's network. Most also cover other routine services, which may require a co-payment, co-insurance or deductible.

**Always refer to your plan documents for your specific coverage.**

### TALK TO YOUR DOCTOR

Consult your doctor for your specific preventive recommendations, as he or she is your most important source of information about your health.

<sup>1</sup> Preventive services that are covered with no cost share are those services described in the United States Preventive Services Task Force A and B recommendations, the Advisory Committee on Immunization Practices (ACIP) of the CDC, and HRSA Guidelines for women, as well as children, including the American Academy of Pediatrics Bright Futures periodicity guidelines. Your plan may cover additional items as preventive. Refer to your plan documents for your specific coverage.
